## WELCOME

Dear Ladies and Gentlemen:

On behalf of our Department of Plastic and Aesthetic Surgery, we would like to personally invite you to join us to the 1st International Breast Symposium Düsseldorf (IBSD) being held April 19-20, 2013.

My team and I have been able to recruit renowned national and international plastic surgeons and senologists as Faculty Members, to initiate discussions of current developments in breast surgery. We would like to take the opportunity to strengthen the cooperation between senologists and plastic surgeons at this symposium and create a platform for an open exchange on various aspects regarding breast reconstruction from an experimental, as well as a scientific perspective.

Key topics:

- Aesthetic breast surgery
- Breast reconstruction with implants and autologous tissue
- Oncoplastic breast surgery
- Innovations in breast surgery
- Lymphnode surgery
- Management of complications

I would like to wish everyone a lively and informative symposium. Our venue, situated on the famous Königsallee, provides a very special ambiance.

I would also like to express my gratitude to the members of the faculty. Without their support, it would not have been possible to present such an outstanding program.

I look forward to welcoming you in Düsseldorf.

Best regards

**Prof. Dr. med. Christoph Andree**

Strattice™ Reconstructive Tissue Matrix  
The next generation of soft tissue repair

For Breast Reconstruction

Postmastectomy and Revisions

Now that's *Bio*Logical

LifeCell™ is a pioneer and leader in regenerative medicine for good reason. Strattice™ Reconstructive Tissue Matrix demonstrated\* to support tissue regeneration<sup>1,3,4,5</sup>, rapid revascularization<sup>1</sup> and minimal adhesions to the implant<sup>2</sup>. In addition, Strattice™ Reconstructive Tissue Matrix is remodeled and transitioned into host tissue. Studies have shown that others may be resorbed over time, or reside in-situ<sup>3,4</sup>. Furthermore, studies have also shown that other matrices may become chronically inflamed and chronic inflammation can have clinically negative effects<sup>5</sup>. With all these things considered, maybe that's why surgeons use LifeCell™ Tissue Matrices. Now that's biological<sup>1,3,4,5</sup>.
